CAREER OBJECTIVE

Motivated Computer Science and Business Systems undergraduate with strong skills in Java, Spring Boot, Python, Flask, Machine Learning and MERN Stack development. Experienced in building scalable full-stack applications and REST APIs, with hands-on internship experience in modern web technologies. Strong problem-solving ability with multiple project implementations and hackathon achievements, seeking Software Developer / ML Engineer roles.

TECHNICAL SKILLS

Programming Languages: Java, Python, C
Frontend: React.js, HTML, CSS, JavaScript
Backend, Database & Tools: Spring Boot, Flask, Node.js, MongoDB, SQL, Git, Docker
Multimedia: Adobe Premiere Pro, Capcut, Davinci Resolve, Unreal Engine
Machine Learning: Pandas, NumPy, Data Processing, Model Building, LLM’s, DNN

SOFT SKILLS

- Leadership
- Adaptability
- Problem Solving
- Resilience

EDUCATION

BTech – Computer Science and Business Systems Francis Xavier Engineering College 2023 – 2027 CGPA: 8.51	Maths Computer Science Little Flower Matric Higher Secondary School Percentage: 88.2%
---	---

INTERNSHIPS

SOFTWARE DEVELOPER , PROFIT.CO, MADURAI Developed AI-powered features and automation solutions using LLMs and APIs.	July 2026 - (Present)
Machine Learning Intern , IIT ROPAR, ONLINE Developed and implemented an AI/ML-based solution as part of an IIT internship, gaining hands-on experience in real-world machine learning and software development.	May - August 2026
Machine Learning Intern, CORIZO EDUTECH PRIVATE LIMITED, Bangalore, India Worked on machine learning concepts using Python and model implementation. Performed datapreprocessing and basic predictive analysis tasks.	June - August 2024
AIML Inplant Training, CodebindTechnologies, Coimbatore Gained exposure to artificial intelligence and machine learning workflows.	May - June 2024

PROJECTS

Geospatial Boundary Surveillance for Coastal Fishermen
Tech Stack: Python, IoT, Geospatial Monitoring

- Developed a geospatial monitoring solution to help fishermen detect maritime boundary proximity.

Food Delivery Web Application
Tech Stack: MERN Stack

- Built full-stack MERN application with authentication and dynamic menu system.

CRUD-Based Game Dashboard
Tech Stack: Spring Boot, React.js, MySQL

- Developed a full-stack game dashboard application using Spring Boot and React.js

Smart Home Anomaly Detection
Tech Stack: Python, Deep Learning

- Built anomaly detection models using deep learning techniques.

Smart Thermal Analysis for Chips
Tech Stack: Deep Learning, IoT , Data Visualization

- Developed deep learning-based thermal analysis solution for chip monitoring.

ACHIEVEMENTS

- First Prize — VISAI Hackathon 2026
- First Prize — Aatral Project Expo
- First Prize — Gracevity Project Expo
- First prize — NGC Tirunelveli Quiz
- Second Prize — PCI Coder’s Battle
- Third Prize — QModelX Hackathon
- Active Google Student Ambassador 2025

CERTIFICATIONS

NPTEL | Introduction to Internet of Things, The Joy of Computing using Python
AWS | Developing Machine Learning Solutions
DeepLearning.AI | Neural Networks and Deep Learning
IBM | Full Stack Development
Packt | SpringBoot Foundations
